ABOUT US

Who are we?

Al Amana has redefined the standard for high-quality adhesives and waterproofing solutions in the construction industry. From humble beginnings in Kuwait, we have become a trusted name across the Middle East, known for our commitment to excellence and innovation.

Founded as the primary supplier of adhesives and waterproofing systems in Kuwait, we rapidly gained the trust of the local market. Our dedication to quality and customer satisfaction fueled our expansion, leading to the establishment of 26 sales points across the region. To further meet the growing demand, we set up a state-of-the-art manufacturing facility in Turkey, where our team of expert chemists and engineers use the finest raw materials to develop products that combine advanced performance with affordability.

Today, we offer a comprehensive range of building materials designed to meet the diverse needs of builders, contractors, and homeowners. With a focus on durability, reliability, and innovation, Al Amana continues to build a legacy of excellence, helping shape the future of construction throughout the GCC and beyond.

“Construction is a matter of optimism, it is a matter of facing the future with confidence”

Ceasar Pelli

ABOUT PRODUCT

PRIORITIZING QUALITY AND EXCELLENCE

At Al Amana, we pride ourselves on delivering a comprehensive range of high-quality building materials tailored to meet the diverse needs of the construction industry. Our products are meticulously developed by a team of skilled chemists and engineers with extensive experience in creating innovative and effective solutions. From tile adhesives and grouts to advanced waterproofing systems, repairing compounds, and specialized cleaning agents, our offerings cover every aspect of modern construction requirements.

Manufactured in our state-of-the-art facility in Turkey, using top-grade raw materials, our products are designed to withstand the most challenging conditions while maintaining affordability. Our tile adhesives and grouts ensure a perfect finish, while our waterproofing solutions provide unmatched protection against water damage. The repairing range offers long-lasting durability, and our cleaning products maintain the pristine condition of surfaces with ease. Additionally, our cold mix asphalt solution is perfect for quick and effective road repairs.

With 26 sales points across the Middle East, we are committed to providing top-quality products and services to builders, contractors, and homeowners. Explore our catalogue to find the latest innovations in construction materials, where science meets quality, ensuring reliability, performance, and aesthetic appeal for every project..

Rising Demand for Quality Building Materials in the Middle East

In recent years, the Middle East has witnessed a remarkable surge in industrial growth, driven by ambitious construction projects, urban development, and infrastructural expansion. As countries in the region continue to diversify their economies and invest in new residential, commercial, and industrial developments, the demand for high-quality building materials has significantly increased. This growth is evident in the rising statistics for construction activities, with billions of dollars allocated to new projects.

COMMITMENT TO QUALITY AND SAFETY STANDARDS IN THE MIDDLE EAST

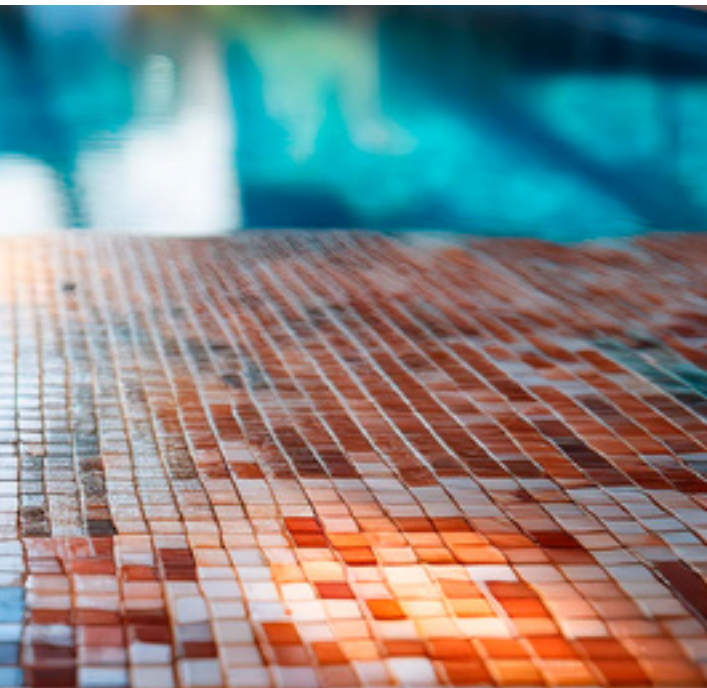

At Al Amana, we are dedicated to maintaining the highest quality and health and safety standards across the Middle East. Our products meet stringent local and international regulations, ensuring exceptional performance and environmental safety. With state-of-the-art manufacturing and strict quality controls, we prioritize safe, durable, and reliable solutions, reinforcing trust and confidence in our offerings throughout the region.

***“Coming together is
a beginning; keeping
together is progress;
working together is
success”.*** - Aristotle

At Al Amana, we understand that collaboration is key to providing our customers with the highest quality building materials and innovative solutions. By partnering with renowned brands such as Kalekim and Al Bunnia, we expand our product range and leverage their expertise to offer a more comprehensive selection to our clients. Kalekim, a leader in adhesives, grouts, and specialty construction materials, brings unmatched innovation and quality that perfectly complements our offerings. Meanwhile, Al Bunnia, with its robust presence in the asphalt and construction sectors, provides reliable and high-performance products essential for diverse applications.

These strategic partnerships enable us to maintain our commitment to quality and innovation while catering to the specific needs of builders, contractors, and homeowners across the Middle East. By collaborating with trusted brands, we enhance our product portfolio, foster knowledge exchange, and ensure that our customers have access to the latest and most effective solutions in the industry. This approach allows us to remain at the forefront of the construction materials market, delivering superior products and unmatched value to our customers.

PRODUCT CATALOG

ADHESIVE & GROUT

Our tile adhesives and grouts are formulated to deliver exceptional bonding strength and durability for all types of tiles, including ceramic, porcelain, and natural stone. With solutions suitable for both interior and exterior applications, our products ensure a flawless finish and long-lasting stability. Whether you are working on walls, floors, swimming pools, or specialized surfaces, our range covers every tiling need with a variety of colors and finishes to match your design vision.

Platinum Fix Lite

Code 90007528

A premium cement-based tile adhesive, Platinum Fix Lite offers a sand-free, high-quality solution for securely fixing ceramic and porcelain tiles on floors and walls. Exceptional durability and ease of use.

Area of Use

Designed for both indoor and outdoor applications, it guarantees long-lasting tile adherence with exceptional shelf life, making it ideal for all types of ceramic and porcelain installations.

Features

- Sand-free, high-strength formula
- Perfect bond for ceramic and porcelain tiles
- Longest shelf life in the industry
- Effortless application for professionals and DIYers

Packaged in a 20 kg bag. Store in a dry, cool place.

Platinum Fix Professional C2TES1

Code 90007529

A high-performance cementitious tile adhesive (C2TES1) engineered for demanding applications. Ideal for installing ceramic and granite tiles on walls and floors, this adhesive excels in both interior and exterior settings.

Area of Use

Suitable for swimming pools, bathrooms, kitchens, and outdoor areas. Bonds effectively on cement board, gypsum walls, and over old tiles, making it ideal for renovation projects in high-temperature environments.

Features

- Strong bond for ceramic and granite tiles
- High-temperature resistant, ensuring long-lasting durability
- Perfect for walls, floors, and exterior applications
- Excellent adhesion to cement board and old tiles

Packaged in a 20 kg bag. Store in a dry, cool place.

Platinum Fix POOL C2FTES2

Code 90007705

A cutting-edge cementitious waterproof tile adhesive (C2FTES2) designed for swimming pools and wet areas. Ideal for heavy, large-format ceramic, porcelain, natural stone, and glass mosaic tiles, ensuring long-lasting durability.

Features

- Waterproof, ideal for wet areas and pools
- Excellent adherence for large, heavy tiles
- High deformation capacity for better flexibility
- Long shelf life and easy-to-use formula

Area of Use

Specially formulated for swimming pools, spa areas, and other wet environments. Suitable for both indoor and outdoor applications, offering a strong bond for large, heavy tiles and natural stones.

Packaged in a 20 kg bag. Store in a dry, cool place.

Platinum Fix High Tech C2FTES2

Code 90007728

An advanced cementitious waterproof tile adhesive (C2FTES2), designed for wet areas such as swimming pools. Perfect for larger, high-quality ceramic, porcelain tiles, natural stone, and glass mosaic installations.

Features

- Waterproof adhesive for wet areas
- Excellent bond for heavy, large-format tiles
- High deformation for flexibility and longevity
- Easy-to-use, with a long shelf life

Area of Use

Ideal for swimming pools, bathrooms, and other wet environments. Suitable for both indoor and outdoor use, it securely bonds large, heavy tiles and natural stones, ensuring excellent durability.

Packaged in a 20 kg bag. Store in a dry, cool place.

Platinum Fix Floor C1TE

Code 90007720

A professional-grade, cementitious tile adhesive formulated for use on floors. Ideal for interior and exterior applications, it provides strong bonding for ceramic and stone tiles in both residential and commercial projects.

Features

- High bond strength for floor tiles
- Resistant to heavy loads and foot traffic
- Suitable for indoor and outdoor use
- Adheres to various surfaces, including old tiles

Area of Use

Perfect for floor installations in high-traffic areas such as kitchens, hallways, and patios. Suitable for use on concrete, screeds, and old tile surfaces, offering excellent performance in varied conditions.

Packaged in a 20 kg bag. Store in a dry, cool place.

Kalekim 2000 FUGA

Code 90006291

A cement-based grout designed for 1 to 6 mm joints, perfect for interior floor and wall applications. Suitable for ceramic tiles, marble, natural stone, and glass mosaics, offering a durable, smooth finish.

Area of Use

Ideal for grouting interior walls and floors in both residential and commercial spaces. Works with a variety of tile types, including ceramic, marble, and glass mosaics, for 1-6 mm joints.

Features

- Smooth finish with excellent abrasion resistance
- Low shrinkage, preventing cracks and fissures
- Easy application with fast curing time
- Available in 16 different colors for design versatility

Packaged in a 5 kg bag. Store in a dry, cool place.

Kalekim 5101 BETOPLUS 101

Code 90006209

BetoPlus 101 is a ready-to-use waterproofing powder admixture designed for cement and sand mortars. It enhances the durability and water resistance of mortars in various construction applications.

Area of Use

Ideal for waterproofing cementitious renders, exterior applications, and flooring mortars under ceramic tiling. Also suitable for concrete basins, foundations, retaining walls, and basement walls exposed to water and humidity.

Features

- Seals concrete's capillary tracts for superior waterproofing
- Unaffected by lime, ensuring long-term performance
- Increases mortar strength without impacting curing or hardening
- Reliable for both interior and exterior applications

Packaged in a 330 g bag. Store in a dry, cool place.

Al AMANA PU Protector

Code 90007145

Al Amana PU Protector is a polyurethane resin-based, two-component, low-viscosity, and transparent coating material. It offers excellent UV resistance, making it ideal for a variety of floor and wall coverings.

Area of Use

Perfect for epoxy or polyurethane floor coatings, as well as PVC, ceramic, and marble coverings. Ideal for decorative exterior cladding and hygienic environments such as hospitals and shopping malls.

Features

- Low-viscosity for smooth application
- Flexible with high adhesion properties
- Excellent UV and chemical resistance
- High wear resistance for long-lasting protection

Packaged in a 7 L can. Store in a dry, cool place.

Kalekim 4210 GROUTART

Code 90006366

4210 GROUTART is a cement-based, polymer-modified, non-shrink, high-fluidity grout mortar. It is designed for precision applications requiring strong, durable, and weather-resistant grout.

Area of Use

Ideal for the precision installation of column base plates, prefabricated concrete structures, and industrial machines such as turbines, generators, and pumps. Suitable for both interior and exterior applications, including concrete repairs.

Features

- High adhesion and compression strength
- Resistant to freeze-thaw cycles and harsh weather
- Water-resistant with no segregation or bleeding
- Easy to prepare and apply, ensuring consistent performance

Packaged in a 25 kg bag. Store in a dry, cool place.

Kalekim 2300 FUGA FLEX

1-6MM

Code 90006538

A high-performance, flexible cementitious grout designed for 1 to 6 mm joints. It offers exceptional abrasion resistance and low water absorption, ideal for demanding indoor and outdoor tile installations.

Area of Use

Perfect for grouting floors and walls in ceramic, granite, glass mosaics, and natural stone tiles. Suitable for wet areas like swimming pools and places with heavy traffic or temperature changes, including terraces, facades, and warehouses.

Features

- High flexibility with excellent strength
- Resistant to freeze/thaw cycles and UV exposure
- Fast curing with low shrinkage, preventing cracks
- Available in 32 colors with a smooth, durable finish

Packaged in a 5 kg bag. Store in a dry, cool place.

WATERPROOFING

Our advanced waterproofing systems provide reliable protection against water damage, ensuring the longevity and integrity of buildings. Designed for use in various environments, from bathrooms and kitchens to basements and outdoor spaces, our waterproofing products are easy to apply and are resistant to both positive and negative water pressure. They are suitable for a wide range of surfaces, including concrete, masonry, and plaster.

Platinum Minor Fix

Code 90007706

Platinum Minor Fix is a void-free, closed-pore waterproofing mixture composed of white crystal granules and natural chemicals. It effectively withstands both positive and negative water pressure, enhancing isolation and protection.

Features

- Excellent resistance to water pressure (positive and negative)
- Strong moisture and water isolation
- Ideal for both internal and external applications
- Provides a durable and reliable solution for water channel repairs

Area of Use

Suitable for waterproofing internal and external areas like bathrooms, swimming pools, and walls. Ideal for repairing water channels and insulating basements against moisture. It is also used for cementitious water pipe connections.

Packaged in a 20 kg bag. Store in a dry, cool place.

Platinum Proof

Code 90007719

Platinum Proof is a high-performance waterproofing compound designed to protect structures from water infiltration. Its advanced formulation ensures long-lasting protection against moisture and water damage.

Features

- Resistant to both positive and negative water pressure
- Strong adhesion to concrete and masonry surfaces
- Easy to apply, ensuring seamless protection
- Durable and long-lasting waterproofing performance

Area of Use

Ideal for waterproofing wet areas such as bathrooms, swimming pools, terraces, basements, and foundations. Suitable for both interior and exterior applications, providing a reliable barrier against positive and negative water pressure.

Packaged in a 20 kg bag. Store in a dry, cool place.

Al Amana Thermal Paint

Code 90006326 / 90007726

AlAmana Thermal Paint is a high-performance, water-based acrylic coating enhanced with micro ceramic-glass technology. It offers superior thermal insulation for both interior and exterior walls and roofs.

Area of Use

Ideal for residential and commercial applications, including houses, public buildings, warehouses, production plants, cold storage facilities, and industrial exteriors.

Features

- Up to 50% energy saving due to low heat conductivity
- Non-flammable and 100% waterproof
- Prevents moisture, dampness, and mold with elastic, crack-resistant formulation
- Easy to apply and water-based for simple cleanup

Packaged in a 18 / 10 kg bag. Store in a dry, cool place.

Kalekim Izolatex Plus 3024

Code 90007749

3024 IZOLATEX PLUS is a highly flexible, waterproofing compound with excellent resistance to salts. It is a polymer-based liquid combined with cementitious powder additives, suitable for both interior and exterior applications.

Area of Use

For waterproofing swimming pools, bathrooms, terraces, and concrete basins. Ideal for foundations, retaining walls, and areas exposed to seawater or de-icing salts.

Features

- Approved for contact with potable water
- Excellent adhesion to concrete and masonry
- Non-corrosive to steel and construction elements
- Resistant to freeze-thaw cycles and de-icing salts

Packaged in a 10 L / 20 kg bag. Store in a dry, cool place.

Kalekim IZOSEAL 2K 3031

Code 90007177

3031 IZOSEAL 2K is a two-component waterproofing system consisting of an emulsion polymer-based liquid and a cement-based powder. It offers excellent water impermeability and enhanced processability.

Area of Use

Suitable for indoor and outdoor applications on both vertical and horizontal surfaces. Ideal for bathrooms, water tanks, foundations, tunnels, elevator pits, brine pools, and fish breeding ponds. Effective on concrete, plaster, and screed surfaces.

Features

- Resistant to both negative and positive water pressure
- High adhesion strength and non-corrosive to reinforcement steel
- Prevents carbonation and resistant to freeze-thaw cycles
- Easy application with brush, roller, or spray

Packaged in a 3 L / 25 kg bag. Store in a dry, cool place.

Kalekim İzoseal 2K 3032

Code 90007050

Kalekim İzoseal 2K 3032 is a two-component, cementitious elastic waterproofing compound designed for both positive and negative water pressure applications on concrete and masonry.

Features

- Resists both negative and positive water pressure
- Approved for use with potable water
- Excellent adhesion to concrete and masonry
- Non-corrosive to steel and construction elements

Area of Use

Designed for both indoor and outdoor applications, it guarantees long-lasting tile adherence with exceptional shelf life, making it ideal for all types of ceramic and porcelain installations.

Packaged in a 3 L / 25 kg bag. Store in a dry, cool place.

Kalekim 3131 Elastikör

Code 90006214

3131 ELASTİKÖR is a one-component, acrylic emulsion-based waterproofing material that is elastic and easy to apply with a brush or roller.

Features

- Highly resistant to UV rays
- 300% elasticity and performs well at low temperatures
- Environmentally friendly, solvent-free, and water vapor permeable
- Forms a seamless, continuous waterproofing layer

Area of Use

Ideal for waterproofing various flat or inclined roofs including concrete, plaster, asbestos cement, aluminum, zinc, PVC, and asphalt (at least one year old). Suitable for use on the north sides of buildings and for crack bridging.

Packaged in a 20 kg bag. Store in a dry, cool place.

Kalekim 8251 Seracare Surface Protector

Code 90006274

8251 SERACARE SURFACE PROTECTOR is a UV-resistant, solvent-based, ready-to-use protective material with excellent penetration properties.

Features

- Water and oil repellent
- Prevents efflorescence and staining
- Enhances the colors of treated materials
- UV resistant for long-lasting protection

Area of Use

Ideal for water, damp, dust, and stain proofing porous materials such as concrete, cotto, clinker, ceramic, granite, brick, natural stone, terrazzo, and grouts. Suitable for both indoor and outdoor applications.

Packaged in a 1 L bottle. Store in a dry, cool place.

REPAIRING

We offer specialized repairing compounds for concrete and masonry surfaces, designed to address everything from minor surface imperfections to major structural repairs. Our repair mortars and coatings provide superior adhesion, high compressive strength, and resistance to freeze-thaw cycles, sulphates, and chlorides. They are suitable for vertical and horizontal applications, ensuring reliable performance in diverse conditions.

Platinum 17 Crack Filler

Code 90006288

Platinum 17 Crack Filler is a high-strength compound specifically formulated to fill and seal deep cracks in concrete and masonry surfaces. Its advanced formula ensures long-lasting repairs and protection against weathering and structural degradation.

Features

- High-strength formulation for durable crack repairs
- Resistant to weathering and structural movement
- Easy to apply, ensuring a smooth and consistent finish
- Suitable for both indoor and outdoor use

Area of Use

Ideal for repairing cracks in concrete floors, walls, foundations, and masonry structures. Suitable for both interior and exterior applications, providing reliable solutions for residential, commercial, and industrial environments.

Packaged in a 4 L / 8 kg bag. Store in a dry, cool place.

Platinum HX 112

Code 90007534 / 90007535

Platinum HX 112 is a high-performance, specialized repair product designed to provide a permanent solution for leaks on wet grounds. It effectively seals and repairs concrete surfaces to prevent water infiltration.

Features

- Provides a permanent, leak-proof seal
- Effective on wet or damp surfaces
- Suitable for a wide range of concrete applications
- Easy to apply with minimal preparation

Area of Use

Ideal for repairing leaks in various conditions where water comes into contact with concrete surfaces, including swimming pools, ornamental pools, terraces, concrete floors, balconies, bathrooms, and toilets.

Packaged in a 1 L / 5 L bottle. Store in a dry, cool place.

Kalekim Self-leveling 4201

Code 90006365

Kalekim Self-Leveling 4201 is a high-performance flooring compound designed to smooth and level thickness variations from 2.5 to 10 mm on both new and existing interior floors.

Features

- Perfectly self-leveling with no shrinkage, cracking, or crazing
- High adhesion strength and can be applied up to 10 mm thickness per coat
- Develops very high compressive and flexural strength
- Excellent resistance to abrasion

Area of Use

Ideal for leveling concrete slabs, cementitious screeds, and existing pavements. Suitable for under wood, laminated parquet, carpet, PVC, linoleum, and ceramic flooring. Effective in high-load areas such as depots, and for floors subject to heavy traffic.

Packaged in a 25 kg bag. Store in a dry, cool place.

Kalekim Repairing Mortar 4003

Code 90006202

Kalekim Repairing Mortar 4003 is a cementitious, polymer-reinforced mortar designed for filling, repairing, and smoothing surfaces before painting. It provides a smooth, durable finish ideal for various repair applications.

Features

- High adhesion strength for a solid finish
- Smooth and easily paintable surface, available in white
- Resistant to freeze-thaw cycles
- Can be applied up to 1-5 mm thickness

Area of Use

Ideal for filling cracks and smoothing surfaces on foamed cement, concrete, and brick walls. Suitable for preparing walls prior to painting or restoration, and repairing old or damaged renders up to 1-5 mm thick.

Packaged in a 20 kg bag. Store in a dry, cool place.

Kalekim 4510 Gypsastar

Code 90006276

Kalekim 4510 Gypsastar is a ready-to-use, synthetic resin emulsion-based primer designed to prepare and enhance surfaces before tiling, screeding, or painting. It improves adhesion and surface quality.

Features

- Reduces porosity and absorption
- Provides uniform surface absorption
- Extends working time for finishing products
- Prevents dusting and enhances adhesion

Area of Use

Suitable for treating anhydrite screeds, plaster, gypsum boards, concrete, render, and brickwork prior to applying cementitious adhesives, self-leveling compounds, and other mortars. Ideal for both interior and exterior surfaces, including vertical and horizontal applications.

Packaged in a 5 L bottle. Store in a dry, cool place.

Kalekim 4410 Primer

Code 90006201

Kalekim 4410 Primer is a cementitious, one-component, polymer-modified coating and primer mortar. It acts as a corrosion inhibitor and adhesion improver for concrete and steel surfaces.

Area of Use

Ideal for protecting concrete reinforcing rods from corrosion and enhancing the adhesion of repair mortars. Suitable for use in environments exposed to water, humidity, chlorides, and de-icing salts.

Features

- Excellent adhesion on concrete and steel
- Resistant to water, humidity, and chlorides
- Protects reinforcing rods from corrosion
- Easy to apply by brush, roller, or spray

Packaged in a 25 kg bag. Store in a dry, cool place.

Kalekim 4004 s40 Self-Repairing Mortar

Code 90006200

Kalekim 4004 S40 is a sulphate and chloride-resistant, cement-based thixotropic repair mortar with polymer and fiber additives. It is designed for structural repairs on concrete surfaces exposed to harsh conditions.

Area of Use

Ideal for repairing high-strength concrete, protecting against sulphates and chlorides, and repairing underwater or substructural concrete members. Suitable for tie-rod holes and concrete structures exposed to seawater, with applications from 5-40 mm thick per coat.

Features

- High adhesion and compression strength
- Resistant to freeze-thaw cycles, sulphates, and chlorides
- Adjustable viscosity for various applications
- Suitable for vertical and overhead use

Packaged in a 25 kg bag. Store in a dry, cool place.

Kalekim 4506 Primer

Code 90006364

Kalekim 4506 Primer is a solvent-free, polymer dispersion-based, pigmented primer designed to improve adhesion on both smooth and absorbent surfaces.

Area of Use

Suitable for smooth and dense surfaces like tile, sandstone, marble, clinker, plywood, and also absorbent surfaces such as gypsum, plaster, concrete, screed, and wood. Not recommended for wet-duty areas or permanently submerged surfaces.

Features

- Enhances adhesion strength by creating a rough surface
- Reinforces substrates, improving tile adhesive performance
- Ready to use, easily applied with a roller or brush
- Solvent-free, odorless, and environmentally friendly

Packaged in a 3 kg bag. Store in a dry, cool place.

Kalekim 4507 B-Tone Smooth Concrete Primer

Code 90006207

Kalekim B-Tone Smooth Concrete Primer is a solvent-free, polymer dispersion-based primer designed for smooth concrete surfaces. It enhances adhesion and improves the performance of cementitious mixes.

Area of Use

Ideal as an admixture to improve flexibility, adhesion, and water impermeability in screeds, renders, repair mortars, and adhesive slurries. Suitable for use on smooth concrete surfaces to prepare them for tiling and finishing.

Features

- Increases adhesion strength by forming a rough surface
- Prevents rapid water loss, improving workability of plasters
- Ready to use and easy to apply with a roller or brush
- Solvent-free, odorless, and environmentally safe

Packaged in a 12 kg bag. Store in a dry, cool place.

CLEANING

Our cleaning solutions are formulated to maintain the beauty and integrity of your surfaces. From powerful stain removers to specialized cleaners for marble, stainless steel, and ceramic, our products are effective yet gentle, ensuring they do not damage or discolor the materials. They are ideal for both residential and commercial use, making maintenance easier and prolonging the lifespan of your surfaces.

Kalekim 8202 Seracare Satin Remover

Code 90006272

Kalekim 8202 Seracare Stain Remover is a non-acidic cleaning agent formulated to remove stubborn stains like coffee, oil, and juices from granite, marble, terrazzo, and other surfaces.

Area of Use

Ideal for removing tough stains such as coffee, wine, oil, and soft drinks from both polished and unpolished surfaces, including marble, ceramic, granite, rustic ceramic, cotto, non-acid-resistant stones, clinker, and grouts.

Features

- Effectively cleans difficult dirt and stains
- Safe for use on sensitive surfaces without causing damage
- Easy to apply and non-acidic, making it gentle on materials

Packaged in a 1 L bottle. Store in a dry, cool place.

Kalekim 8203 Seracare Grout Cleaner

Code 90006273

Kalekim 8203 Seracare Grout Cleaner is an organic-based cleaning agent designed to remove dirt, lime, and detergent residues from tile, porcelain tile, and grouts without causing damage.

Area of Use

Ideal for cleaning dirt, lime, and detergent residues from ceramic, porcelain ceramics, and grouts. Not suitable for marble, granite, or other natural stones.

Features

- Effectively removes natural dirt and residues
- Safe for grouts due to its organic formula
- Environmentally friendly and gentle on surfaces

Packaged in a 500 ml bottle. Store in a dry, cool place.

Platinum Ceramic and Joint Cleaner

Code 90007539

Platinum Ceramic and Joint Cleaner is a powerful cleaning solution designed to effectively remove stains, dirt, and grime from ceramic tiles and grout joints, restoring their original shine and appearance.

Area of Use

Perfect for cleaning ceramic tiles, porcelain, and grout joints in kitchens, bathrooms, and other tiled areas. Suitable for both residential and commercial use on floors and walls.

Features

- Effectively removes stains, dirt, and grime
- Restores the original shine of ceramic tiles and grout
- Non-abrasive and safe for regular use
- Easy to apply with a sponge or brush

Packaged in a 500 ml bottle. Store in a dry, cool place.

Platinum Oil and Rust Remover

Code 90007542

Platinum Oil and Rust Remover is a specialized cleaning solution designed to effectively dissolve and eliminate oil stains, rust, and other tough residues from a variety of surfaces, restoring their original look.

Area of Use

Ideal for use on concrete, stone, metal, tiles, and other hard surfaces affected by oil spills, rust stains, or other stubborn residues. Suitable for garages, driveways, industrial floors, and outdoor surfaces.

Features

- Quickly dissolves and removes oil stains and rust
- Restores surfaces to their original condition
- Non-toxic and environmentally friendly formula
- Safe for use on a variety of materials

Packaged in a 500 ml bottle. Store in a dry, cool place.

Platinum Inox Cleaner

Code 90007541

Platinum Inox Cleaner Spray is a high-performance cleaning solution specially formulated to clean, polish, and protect stainless steel surfaces, leaving them shiny and streak-free.

Area of Use

Ideal for use on all stainless steel appliances, fixtures, and surfaces in kitchens, bathrooms, and commercial spaces. Suitable for cleaning sinks, refrigerators, ovens, range hoods, and more.

Features

- Cleans and polishes stainless steel surfaces
- Provides a streak-free, shiny finish
- Protects against fingerprints, watermarks, and smudges
- Cleans and polishes stainless steel surfaces

Packaged in a 500 ml bottle. Store in a dry, cool place.

Platinum Cement Cleaner

Code 90007540

Platinum Cement Cleaner is a powerful, acid-based formula designed to remove cement residues, mortar stains, and efflorescence from various surfaces, restoring their original appearance without damage.

Area of Use

Ideal for cleaning cement residues from tiles, bricks, natural stone, and masonry surfaces. Suitable for use on construction sites, renovation projects, and post-installation cleaning tasks.

Features

- Effectively dissolves cement, mortar stains, and efflorescence
- Safe for use on tiles, bricks, and most masonry surfaces
- Fast-acting formula for quick results
- Easy to apply with a brush or sponge

Packaged in a 1000 ml bottle. Store in a dry, cool place.

Platinum Engine Outer Surface Cleaner

Code 90007533

Platinum Engine Outer Surface Cleaner is a high-strength cleaning solution specially formulated to remove grease, grime, oil, and dirt from the outer surfaces of engines, leaving them clean and free from buildup.

Area of Use

Ideal for cleaning the outer surfaces of car, motorcycle, and industrial engines. Suitable for use in garages, workshops, and automotive service centers, ensuring engines are well-maintained and presentable.

Features

- Effectively dissolves grease, oil, and dirt buildup
- Safe for use on metal, rubber, and plastic components
- Non-corrosive formula protects engine parts
- Quick action for fast and efficient cleaning

Packaged in a 1000 ml bottle. Store in a dry, cool place.

Platinum Stain Remover

Code 90007538

Platinum Stain Remover is a powerful, multi-purpose cleaning solution designed to tackle tough stains on various surfaces, including fabrics, carpets, upholstery, and hard surfaces, restoring them to their original condition.

Area of Use

Perfect for removing stubborn stains like wine, coffee, grease, ink, and food spills from fabrics, carpets, upholstery, and hard surfaces in both residential and commercial settings.

Features

- Effectively removes a wide range of tough stains
- Safe for use on multiple surfaces, including fabrics and hard materials
- Fast-acting formula for immediate results
- Non-toxic and environmentally friendly

Packaged in a 500 ml bottle. Store in a dry, cool place.

Platinum Concentrated AC cleaner

Code 90007536

Platinum Concentrated AC Cleaner is a powerful cleaning solution formulated to remove dirt, dust, mold, and other contaminants from air conditioning units, ensuring efficient performance and improved air quality.

Features

- Deep cleans and removes mold, dust, and dirt buildup
- Improves AC efficiency and airflow
- Non-corrosive formula safe for metal and plastic components
- Concentrated formula for cost-effective use

Area of Use

Ideal for cleaning the coils, fins, and filters of both residential and commercial air conditioning units, including split systems, window units, and HVAC systems.

Packaged in a 1000 ml bottle. Store in a dry, cool place.

Platinum White Goods and Stain Remover

Code 90008543

Platinum White Goods Stain Remover is a specialized cleaning solution designed to remove stubborn stains, discoloration, and grime from white household appliances, restoring their original appearance and shine.

Features

- Effectively removes stains, discoloration, and grime
- Safe for use on all types of white goods
- Restores original shine and maintains the appliance's appearance
- Non-abrasive formula prevents surface scratches

Area of Use

Perfect for use on white goods such as refrigerators, washing machines, dishwashers, ovens, and microwaves. Suitable for both interior and exterior surfaces to eliminate stains, grease, and dirt.

Packaged in a 500 ml bottle. Store in a dry, cool place.

Platinum Clog Remover

Code 90007532

Platinum Clog Remover is a powerful, fast-acting solution designed to clear and dissolve tough clogs in drains and pipes, ensuring smooth water flow and preventing blockages in kitchens, bathrooms, and other areas.

Features

- Quickly dissolves and clears tough clogs
- Safe for use on all types of plumbing, including PVC, metal, and septic systems
- Non-corrosive formula protects pipes and plumbing

Area of Use

Ideal for use in kitchen sinks, bathroom drains, showers, bathtubs, and other household pipes. Suitable for both residential and commercial settings to clear clogs caused by grease, hair, soap scum, and other debris.

Packaged in a 1000 ml bottle. Store in a dry, cool place.

Platinum Marble Cleaner

Code 90007537

Platinum Marble Cleaner is a gentle yet effective cleaning solution specifically formulated to clean and maintain marble surfaces. It removes dirt, grime, and stains without damaging or dulling the natural shine of marble.

Features

- Safely cleans and enhances the natural shine of marble
- Removes dirt, grime, and minor stains without scratching
- pH-balanced formula prevents damage and dulling
- Non-abrasive and non-corrosive for daily use

Area of Use

Ideal for use on all marble surfaces, including countertops, floors, walls, and decorative pieces. Suitable for both residential and commercial settings to maintain the elegance and appearance of marble surfaces.

Packaged in a 1000 ml bottle. Store in a dry, cool place.
